WHO WE ARE- Our EcoSystem

TruClear is a multi discipline organization. We have operating divisions that have a number of the elements needed to bring this kind of program to market.

TruClear Sourcing Group
International Licensed Importer / Exporter
FDA Importer and Re-packer
Direct Product Sourcing – China
International Sales and Distribution Channels

TruClear Medical Group
PPE Products
FDA Listed Serology Test
FDA Approved Medical Supplies
Sales and Distribution Channels

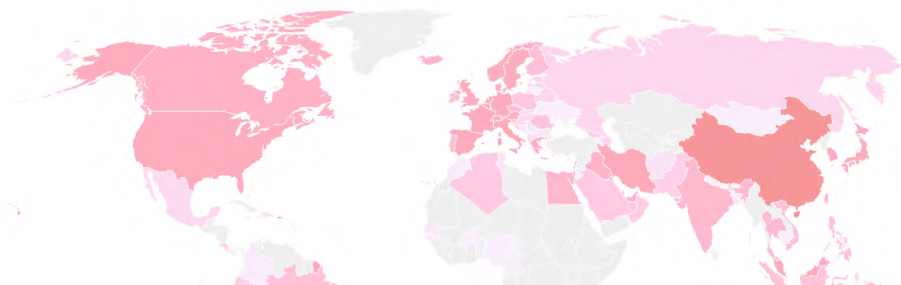

NextGen is an R&D driven molecular diagnostic laboratory based in Newport Beach California.

NextGen is **CLIA Certified** and **CAP Accredited**.

ABOUT GSS

Founded in 2015, Global Sourcing Specialist is a licensed and bonded FDA registered importer. We are dedicated to providing high quality PPE and medical supplies to municipalities, government agencies, contractors, commercial businesses, first responders as well as healthcare providers. The brand, Rapid Supply Services, is wholly owned by Global Sourcing Specialist. With all of today's challenges, speedy deliveries and customer satisfaction are essential. Please contact us to learn more about available equipment and delivery schedule. Let Global Sourcing Specialist be your resource for all of your PPE, Medical Equipment, and safety products.

N95 MASKS

SKU: RSS- N95

PRICE: \$4.25*

50 pcs per box / 20 boxes per carton
MOQ - 1 box

PRODUCT DESCRIPTION

N95 is a disposable particulate respirator that is designed to help provide reliable respiratory protection of at least 95 percent filtration efficiency against certain non-oil based particles. This respirator is designed for use for particles such as those from grinding, sanding, sweeping, sawing, bagging, or other dusty operations. This respirator can also help reduce inhalation exposures to certain airborne biological particles but cannot eliminate the risk of contracting infection, illness, or disease.

*Price subject to change per time of inquiry and volume

KN95 MASK

SKU: RSS- KN95

PRICE: \$3.25*

50 pcs per box / 20 boxes per carton
MOQ - 1 box

PRODUCT DESCRIPTION

"It is reasonable to consider China KN95, AS/NZ P2, Korea 1st Class, and Japan DS FFRs as equivalent to US NIOSH N95 and European FFP2 respirators, for filtering non-oil-based particles such as those resulting from wildfires, PM 2.5 air pollution, volcanic eruptions, or bioaerosols (e.g. viruses)"**

- ▣ 14ft high straight sidewalls for multiuse
- ▣ 365,000 square foot semi-permanent space - **AVAILABLE TODAY**

In-Room and Venue Disinfecting Solution

SAFE and NATURAL 100 times more powerful than Chlorine Bleach.

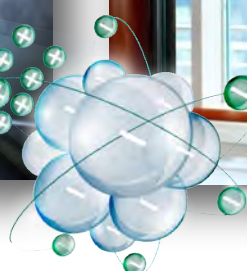

Electrolyzed water is an all-natural, non-toxic, and non-hazardous solution that can be used for disinfecting or degreasing.

This solution is a powerful oxidant called Hypochlorous acid (HOCl) which is 100 times more powerful at killing microbial pathogens than Chlorine Bleach.

A 100% safe and non-irritant. Harmless if ingested by accident, it can be sprayed in to the air, on hard and non-porous surfaces, walls, desks, floors and more. It is found in our blood as one of the most powerful biological oxidants generated by our white blood cells.

There are over 300 published research articles on the disinfecting power of electrolyzed water.

Effective against SARS COV-2 the novel Coronavirus on hard and non-porous surfaces. Kills bacteria, bacterial spores, viruses, and fungi 100x more effectively than chlorine bleach other hard chemicals.

Mobile Thermometry Disinfection Station

12 seconds per screening

Cleared Approved to Enter Workplace

Failed Screening

- Facial Recognition Scan / Database
- Temperature Reading
- Hand Sanitizer
- Face Mask Confirmation
- Sterilization Misting upon EXIT

Product Description

This product is used for body temperature detection and spray disinfection for people entering and leaving public areas.

The inductive design, reduce human operation and monitoring, reduce the workload of security personnel, greatly reduce the work risk of high-frequency contact personnel, and effectively avoid cross infection.

The solution is ideal for Hospitals, schools, communities, enterprises and institutions, public transportation, entertainment places, hotels and other public areas.

Operations

Enter the temperature measurement area, and align the forehead with the infrared sensor. The distance between the forehead and the sensor is 6 inches. Wait for about 3 seconds, and the temperature collection interval happens in 2 seconds.

The equipment will collect the body surface temperature, display it in the panel, and judge at the same time. Normal readings will prompt the green light on and voice that the temperature is normal, and the over temperature would illuminate the red light and give intermittent alarm sound.

The temperature qualified user must open their hands to the bottom of the hand disinfection machine. The disinfectant automatically induces the spray into the palm of the hand to apply. The system also checks for a face mask if applicable.

After hand disinfection, you can enter the spray body disinfection channel and walk out slowly.

Touchless Hand Sanitizer Station - Adjustable Height, 4' - 6'

PRICE: \$490.00
