

A NEW Standard in Corporate Safety & Wellness

Protect your TEAM from COVID-19

# WHO **ARE WE – Our Ecosystem**

TruClear is a multi discipline organization. We have operating divisions that have a number of the elements needed to bring this kind of program to market.

TruClear Sourcing Group
International Licensed Importer / Exporter
FDA Importer and Re-packer
Direct Product Sourcing – China
International Sales and Distribution
Channels

TruClear Medical Group
PPE Products
FDA Listed Serology Test
FDA Approved Medical Supplies
Sales and Distribution Channels

NextGen is an R&D driven molecular diagnostic laboratory based in Newport Beach California.

NextGen is **CLIA Certified** and **CAP Accredited**.

## THE **NEED FOR SCREENING**

Per The CDC,

Serology testing looks for the presence of antibodies, which are specific proteins made in response to infections. Antibodies can be found in the blood and in other tissues of those who are tested after infection. The antibodies detected by this test indicate that a person had an immune response to SARS-CoV-2, whether symptoms developed from infection or the infection was asymptomatic. Antibody test results are important in detecting infections with few or no symptoms.

Additionally, per the CDC, a positive result from this point of care test qualifies a patient for a COVID-19 molecular diagnostic test without any additional coverage criteria.

## **OUR ADVANTAGE**

# Our program is fully *Compliant* with ALL Four Federal Governing Agencies

The **FDA** has three basic responsibilities:

- Protect the public health
- Advancing the public health
- Ensuring security of food supply and fostering development of needed medical products to address public health threats.

The **FDA** accomplishes this mission by using the laws and regulations to verify that manufacturers are following cGMP.

**CDC** works to protect America from health, safety and security threats, both foreign and in the U.S.

Whether diseases start at home or abroad, are chronic or acute, curable or preventable, human error or deliberate attack, **CDC** fights disease and supports communities and citizens to do the same.

CMS – the Centers for Medicare and Medicaid Services is an agency of the Federal Government, part of the DHHS.

The **CMS** is responsible for the oversight of the Medicare program that covers reimbursements.

**CLIA** establishes the quality standards for all non-research laboratory testing performed on human specimens.

**CLIA** established quality standards for laboratories to ensure the accuracy, reliability and timelines of patient test results regardless of where the test is performed.

## WHAT **SCREENING MEANS TO THE PROGRAM**

## **Asymptomatic:**

Means "showing no evidence of disease or active infection.

Studies have shown potentially up to 80% of CoV-2 carriers could be asymptomatic.

## Symptomatic:

As defined by displaying physical symptoms related to an active infection which may include but are mot limited to the following – fever, chills, dry cough, body acks, intestinal pain and fatigue.

## **Action Taken**

## **Asymptomatic**

A. Serology Screening Test ONLY

## **Serology Test Result Options**

<u>Negative</u> – End of medical encounter <u>Positive</u> – NG Swab for COVID-19 confirmation, send swab to lab for confirmation. Remove from workplace until results are received.

## **Symptomatic**

- A. Serology Screening Test
- B. Collect an NG Swab for a FULL respiratory Panel Screening including COVID-19
- C. Send swab to lab for confirmation
- Remove from workplace until results are received

# Introducing our Location Based Solution for the Las Vegas Hospitality Market

# The SAFE VELL MARKET SAFE Program

Using Advanced Diagnostics to Create a Safe Workplace

## WHAT WE DELIVER WITH THIS PROGRAM

## CREATING A BETTER WORKPLACE

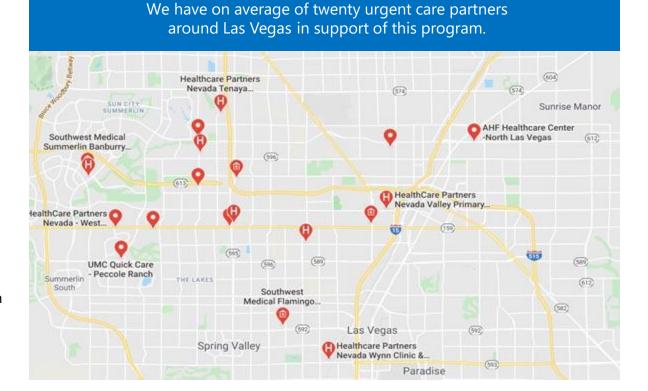

Our concerns are the same as yours: Early and effective action against infections.

## Better care. Better quality of life for your team members.

Our proactive program was created to combat COVID-19 exposure in the workplace. Our program works to keep everyone healthy and virus FREE through this global pandemic and beyond.

**Step 1** - We created a network of urgent care physician practices around each of our major markets.

These professionals will administer a point of care COVID-19 screening test, which detects an active infection due to the CoV-2 virus. We can tailor the testing frequency based on each individual location. These tests are covered by Medicare, Blue Cross, UHC and most major insurance providers.

**ALL TEAM MEMBERS** would need to go to one of these approved locations for a 15 min screening. Test results and certification of the screening would be provided to each person. Team members would be required to bring the results to the venue to obtain access to the clean work zone pre, post reopening.

**Discreet Testing**Care Locations

Screening / Test
A health care professional administers the test.
Results 15 min

# Results Certificate A test results

certificate will be provided to each team member.

step

# A NEGATIVE RESULT – COVID-19 Screening Test

A negative result for the antibodies associated with the CoV-2 virus Implies that there is no current active infection\*

You are **FREE** and cleared to

## Join the Onsite Workforce

Skip Step 2 proceed to step 3

[\*] A negative result doesn't eliminate the possibility of the CoV-2 virus being present. Typical incubation is five to seven days and therefore not always detected at the time of testing.

# A POSITIVE RESULT – COVID-19 Screening Test

A positive result for the **short-term antibodies only**, would imply that there is a current active infection.

Proceed to step 2

For A Molecular Diagnostic Confirmation For COVID-19

A positive result for both the **short-term and long-term antibodies**, would imply that there is a current active infection, but may be more progressed.

Proceed to step 2

For A Molecular Diagnostic Confirmation For COVID-19

A positive result for the **long-term antibodies only**, would imply that an infection due to the CoV-2 virus was present and has been resolved.

Proceed to step 2

For A Molecular Diagnostic Confirmation For COVID-19

# COVID-19 MOLECULAR Diagnostic CONFIRMATION

# Confirmation testing for positive Serology result or symptomatic patients.

The Health Care Professional will administer the COVID-19 test:

- 1. Collect the specimen / NG Swab
- 2. Transport to NextGen Labs
- 3. Test for COVID-19
- 4. Test Full Respiratory Panel
- 5. Results / Notify Client
- 6. Bill Patient Insurance

# **72 Hour Test Results**

**Note:** A quarantine period may be necessary until results are determined

step

## ONSITE WORKFORCE SCREENING – Track Entrance

## **Arriving Team Members**

## **Each Person Should Have:**

- Test Result Certificate
- ID Badge

# Cleared Approved to Enter Workplace

**Failed Screening** 

# Main Entrance Walkthrough Solution Functions

Facial Recognition Scan / Database
Temperature Reading
Hand Sanitizer
Face Mask Confirmation
Sterilization Misting upon EXIT

12 seconds per screening

## **A Failed Screening Means**

- Improper Serology Test Certificate\*
- Improper PPE Gear Face Mask / Safety Gear
- Failed Facial Recognition Match
- Abnormal Temperature Reading\*

[\*] This may require additional testing to be performed by a participating health care professional.

# TECHNOLOGY 82 PPE GEAR

## **OUR SCREENING SOLUTION CHAMBERS**

# Mobile Thermometry Disinfection Station

This product is used for body temperature detection and spray disinfection for people entering and leaving public areas.

The inductive design reduces human operation and monitoring, reduces the workload of security personnel, greatly reduces the work risk of high-frequency contact personnel, and effectively avoids cross infection.

The solution is ideal for Hospitals, schools, communities, enterprises and institutions, public transportation, entertainment places, hotels and other public areas.

**Option A** With Misting Chamber

**Option B** No Misting Chamber

# OUR VENUE DISINFECTING SOLUTION

SAFE and NATURAL 100 times more powerful than Chlorine Bleach.

Various precautions have been taken to prevent the spread of infection. The Ministry of Health, Labor and Welfare has announced the importance of disinfection along with hand washing, masks and goggles.

The use of disinfecting alcohol and 0.1% sodium hypochlorite is recommended for disinfection.

However, **hypochlorous acid water** (generated by electrolysis of NaCl or hydrochloric acid) that has a bactericidal activity that is not inferior to them and extremely safe for the human body and the environment.

Very useful in preventing infection in the room and round the entire property.

# OUR IN-ROOM DISINFECTING SOLUTION

SAFE and NATURAL 100 times more powerful than Chlorine Bleach.

Electrolyzed water is an all-natural, non-toxic, and non-hazardous solution that can be used for disinfecting or degreasing.

This solution is a powerful oxidant called Hypochlorous acid (HOCl) which is 100 times more powerful at killing microbial pathogens than Chlorine Bleach.

A 100% safe and non-irritant. Harmless if ingested by accident, it can be sprayed in to the air, on hard and non-porous surfaces, walls, desks, floors and more. It is found in our blood as one of the most powerful biological oxidants generated by our white blood cells.

There are over 300 published research articles on the disinfecting power of electrolyzed water.

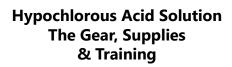

Effective against SARS COV-2 the novel Coronavirus on hard and non-porous surfaces.

Kills bacteria, bacterial spores, viruses, and fungi 100x more effectively than chlorine bleach other hard chemicals.

# MULTIPLE **ELECTROSTATIC SPRAYERS FOR THE JOB**

From the guest rooms to the boardroom. This solution can be used in lobbies, gyms and other public areas.

Our electrostatic solution is hospital-grade disinfectants to sanitize throughout the hotel / venue. The cleaning agents are recommended by the Centers for Disease Control and Prevention and the World Health Organization to kill all known pathogens.

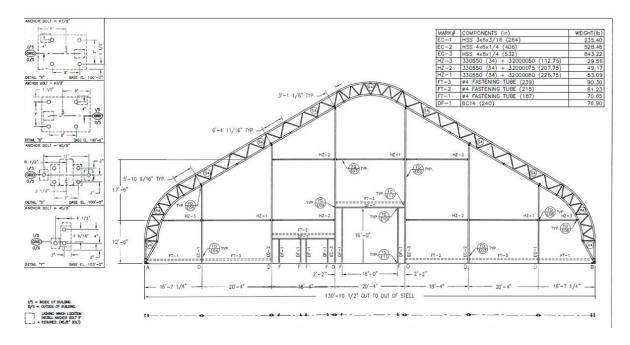

## RAPID STRUCTUAL SOLUTIONS

We can ship in 10 days from a signed contract – 130' (w) up to 1,250' (l)

## **In Stock Tent Features:**

- ☐ IBC2003 Building Code Compliant for permanent use
- Environmentally Conditioned Heating and Cooling
- Sprinklers, Fire Alarms
- ☐ Hanging Loads for Signage / Custom Graphics
- ☐ 14ft high straight sidewalls for multiuse
- ☐ 365,000 square foot semi-permanent space **AVAILABLE TODAY**

# OUR THERMAL SCREENING DEVICES - www.rapidsupplyservices.com

## IR THERMOMETER

SKU: RSS- IRTHERM

### PRODUCT DESCRIPTION

Non-contact Infrared Thermometer Forehead Baby Thermometers °C / °F LCD Body Digital Temperature Lightweight IR Detachable Measurement Tool with CE & FDA Approved Certification

## IR THERMOMETER, HANDHELD

SKU: RSS- THERMOCAM

## PRODUCT DESCRIPTION

Handheld thermal camera specially designed for body temperature measurement with a 160×120 resolution thermal detector. It can discover and track people with higher body temperatures in a crowded public area. Ideal for use in places such as customs ports, airports, schools and hospitals for inspection and quarantine. Battery Operating Time: 4-5 hours.

# FACIAL RECOGNITION AND THERMOMETER

SKU: RSS- FACE

### PRODUCT DESCRIPTION

Infrared temperature detection can reduce the risk of cross infection and save materials and human resources.

- Temperature measurement accuracy: ± 0.3°C
- Full-time: Real-time online working mode to improve detection efficiency
- Deployment: No blackbody required, easy to deploy and install without affecting existing environment
- Initiative: Improve initiative of quarantine work based on active temperature detection and control.

## **THERMOGATE**

SKU: RSS- THERMOGT

### PRODUCT DESCRIPTION

This solution can be used in the entrance and exit of an office building or embassy to solve the problem of dangerous material detection and temperature detection. The thermo technology allows for better entry and exit. Also an option at existing security gates for viewing, camera imaging and alarms.
